

River Thames Scheme

Preliminary Environmental Information Report
Volume 3: Figures Contents Page

January 2024

View of the River Thames at Laleham Park looking south towards the M3 crossing

Table of Contents

1 Introduction

No Figures

2 Project Description

Figure 2.1 – Design of Flood Channel, Associated Features and River Thames Capacity Improvements

Figure 2.2 – Potential Construction Car Park Locations

Figure 2.3 – Public Rights of Way Affected by the Project

3 Consideration of Alternatives

No Figures

4 Approach to the Environmental Assessment

No Figures

5 Site Description

Figure 5.1 – Air Quality Study Areas

Figure 5.2 – Air Quality Management Areas

Figure 5.3 – 2019 Annual Mean NO₂ Monitoring Results

Figure 5.4 – Biodiversity Study Area

Figure 5.5 – Climatic Factors Study Area

Figure 5.6 – Cultural Heritage Study Area

Figure 5.7 – Designated Heritage Assets

Figure 5.8 – Flood Risk Study Area

Figure 5.9 – 3.33% (1 in 30) Annual Chance Fluvial Flood

Figure 5.10 – 1% (1 in 100) Annual Chance Fluvial Flood

Figure 5.11 – 1% (1 in 100) Annual Chance Fluvial Flood +35% Climate Change

Figure 5.12 – 0.1% (1 in 1000) Annual Chance Fluvial Flood

Figure 5.13 – Combined Surface Water Flood Event

Figure 5.14 – Health Study Area

Figure 5.15 – 2019 English Census Wards

Figure 5.16 – Landscape and Visual Amenity Study Area

Figure 5.17 – Existing Green Infrastructure Connections

Figure 5.18 – Published Landscape Character Assessments

Figure 5.19 – Published Landscape Typology

Figure 5.20 – Landscape and Visual Impact Assessment: Public Rights of Way

Figure 5.21 – Materials and Waste Study Area

Figure 5.22 – Materials and Waste Baseline Information

Figure 5.23 – Noise and Vibration Study Area

Figure 5.24 – Socio-economics Study Area

- 13 Materials and Waste**
No Figures
- 14 Noise and Vibration**
Figure 14.1 – Noise and Vibration Receptors and Survey Locations
- 15 Socio-Economics**
No Figures
- 16 Soils and Land**
No Figures
- 17 Traffic and Transport**
Figure 17.1 – Materials Management Strategy Construction Routes
- 18 Water Environment**
Figure 18.1 – Hydraulic Connections
- 19 Cumulative and In Combination Effects**
Figure 19.1 - Cumulative Effects Assessment - Zones of Influence
- 20 Stakeholder Engagement**
No Figures
- 21 Next Steps**
No Figures

The River Thames Scheme represents a new landscape-based approach to creating healthier, more resilient and more sustainable communities by reducing the risk of flooding and creating high quality natural environments.
